

SHEPHERD BOWLING

Houston, Texas 77030 | (832) 913-9441 | sgb5@rice.edu | [linkedin.com/in/Shepherd-Bowling](https://www.linkedin.com/in/Shepherd-Bowling)

EDUCATION

Rice University | George R. Brown School of Engineering and Computing

Master of Computer Science | Artificial Intelligence Specialization

Jan 2025 — May 2027

Bachelor of Computer Science

August 2022 — December 2026

- Student-Athlete | Football
- First football student-athlete to receive a bachelor of computer science degree in over a decade at Rice University
- American Athletic Conference Honor Roll: 2023, 2024, 2025
- Conference USA Commissioner's Honor Roll 2022

United States Military Academy at West Point

July 2021 — May 2022

- Dean's List: Fall 2021, Spring 2022

Relevant Coursework:

- Concurrent Program Design, Compiler Construction, Computer Systems Architecture, Computer Systems, Parallel Programming, Reasoning About Algorithms, Computer Architecture, Organization of Computer Programming, Program Design, Algorithmic Thinking, Computational Thinking, Fundamentals of Computer Engineering, Computing Fundamentals.

EXPERIENCE

Apache Corp.

June 2025 — August 2025

IT Analyst Intern

Applications Team:

- Facilitated the enhancement of the SAP system to replace an existing application that was being outsourced by replicating it within SAP, providing \$100K in annual savings.

IT Data Management and Analytics:

- Created a Power Query SDK script that linked to a Microsoft Azure API Management system.
- Developed an Azure API Management program that received Power BI data, transferred it to a Palantir Foundry program, and then called the API and returned the information to Power BI.

PROJECTS

Real-Time Web Messaging Application | *HTML, TypeScript, CSS, noSQL*

November 2025

Designed and implemented a fully functional, real-time web-based messaging client similar to Discord/Slack.

- Architected a completely static, library-free frontend using only vanilla TypeScript, HTML, CSS, and open-shadow-DOM web components
- Delivered login, workspaces, channels, threaded posts, dynamic reply input positioning, markdown formatting (bold, italic, links, emoji reactions), and live emoji reaction capabilities.

Evaluating and Ranking Top Free Agent Pitchers | *R, CSV*

October 2024

Analyzed baseball data from the 2024 MLB regular season to project future performance for top free-agent pitchers.

- Calculated and compared four common pitcher-evaluating metrics to identify key performance indicators, including projecting future performance in terms of runs prevented.
- Presented a four-page data-driven report ranking the pitchers, including visualizing results using a scatter plot, to effectively communicate findings and provide actionable insights for hypothetical free agent signings.

Analyze Network Resiliency | *Python*

February 2023

Graph exploration via breadth-first search to reason about the resilience of networks.

- Determined the resilience of networks by analyzing random and targeted attacks on disrupting the network's topology.
- Quantified this effect by inspecting the change to the size of the largest connected component in a graph of a network.
- Wrote a program to find this component and see the effects of different attacks on it.
